口险版件	2020.04.00 10.04

试卷得分 65

DGPS receivers must have a separate receiver for differential correnction signals.
判断题 (5分) 5分
A. True
B. False
正确答案: A
2. Obstacles such as trees and buildings interfere less with DGPS beacons than satellite transmission.
判断题 (5分) 5分
A. True
B. False
正确答案: B
3. Hills and bluffs can always block ground waves.
判断题 (5分) 5分
A. True
B. False
正确答案: B
4 is the most important factor affecting every decision a farm manager makes.
填空题 (5分) 0分 (请按题目中的空缺顺序依次填写答案)
yield 回答错误
正确答案:
① Money
 Of all these possible uses of precision farming techniques, is the most logical starting point for a farmer interested in adopting the technology.
填空题 (5分) 0分 (请按题目中的空缺顺序依次填写答案)
to achieve better economic benefits 回答错误

	entined by entire its	or	code.	
题 (10 分) 0 分	(请按题目中的空缺顺序依次填写	答案)		
SVN			回答错误	
PRN			回答错误	
确答案:)Space Vehicle Num	nber			
) Pseudorange Noise				
_	begin to fade between m the transmitting tower.	and		
	g			
匢 (5分) 5分	请按题目中的空缺顺序依次填写各	答案)

9. The concept of treating small areas of a field as separate management units is new.

正确答案:
① Yield Monitoring

A. True
B. False
正确答案: B
10. It is possible to apply pesticide to individual plant while driving across the field.
判断题 (5 分) 5 分
A. True
B. False
正确答案: A
11 is the variation in measured crop and soil characteristics over distance and depth.
填空题 (5分) 0分 (请按题目中的空缺顺序依次填写答案)
Yield Map 回答错误
正确答案: ① Spatial variability
12. In order for DGPS to work,both the moving GPS receiver and the base station receiver must be able to "see" the same satellites at the same time.
判断题 (5 分) 5 分
A. True
B. False
正确答案: A
13. The arrangement of satellites is called a
填空题 (5分) 5分 (请按题目中的空缺顺序依次填写答案)
constellation
正确答案: ① constellation
14. Current whole-field management approaches often ignore variability in soil-related characteristics.
判断题 (5 分) 5 分
A. True

判断题 (5分) 5分

B. False

正确答案: A
